CAREER SUMMARY

I am an experienced Software Quality Assurance Engineer with a strong background in manual and automated testing. I have conducted smoke, sanity, and regression tests, developed detailed test cases, and performed smart contract testing for Web 3 applications using Remix IDE. Proficient in mobile app automation with Appium Studio and test automation with Katalon Studio & Cypress for end-to-end test automation, I also have expertise in API testing using Swagger and Postman, and load testing with K6. Additionally, I have front-end development experience with HTML, CSS, Bootstrap, JavaScript, and ReactJS.

PROFESSIONAL EXPERIENCE

AMMAG TECHNOLOGIES

JAN 2023- PRESENT

SOFTWARE QUALITY ASSURANCE ENGINEER

- Conducted smoke, sanity, and regression testing.
- Developed and executed test cases.
- Performed smart contract testing of Web3 applications using Remix IDE.
- Gathered and analyzed requirements.
- Utilized Appium Studio for mobile app automation
- Katalon Studio for test automation for web2 and web3 applications.
- Automated front-end test using Cypress for Web applications.
- Conducted RESTful API testing using Swagger and Postman.
- Executed performance/load testing on APIs and servers with K6.

Front End Developer

DEC 2021 - DEC 2022

- HTML5, CSS3, and Bootstrap: Developed responsive web interfaces with modern design principles.
- JavaScript and ReactJS: Created dynamic and interactive web applications using class-based and functional components, React Hooks, and lifecycle methods.
- Marketplaces and Admin Panel Projects: Implemented conditional rendering, state management with Context API, useContext, Redux, and Redux Toolkit.
- MetaMask Connectivity: Managed user interfaces and integrated MetaMask for blockchain connectivity.
- Smart Contract Implementation: Integrated smart contracts into React.js applications.
- 3rd Party Libraries: Leveraged various third-party libraries to enhance functionality and performance.

Frontend Developer Internship - Blue Horn Technologies

JULY 2021 - DEC 2021

- HTML and CSS: Developed and styled web pages to create visually appealing and functional user interfaces.
- Bootstrap: Utilized Bootstrap framework for responsive design and efficient layout structuring.
- React.js: Gained foundational knowledge and hands-on experience with React.js, including creating components and managing state.

EXPERTISE

- Manual Testing
- Documentation
- Testcase Writing
- Load Testing
- Automation
- Appium Studio
- Katalon Studio
- Cypress.io
